DETAILED ACTION

(1)

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-28, 46, 47, and 60, drawn to a method and apparatus of producing a multi-layered image transfer member.

Group II, claim(s) 29-45, 48-59, and 61-65 drawn to an image transfer member.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Claim 29, drawn to an image transfer member suitable for the transfer of toner images and having an outer release layer of silicone, is not novel based upon the fact that U.S. Patent No. 4,066,802 to Clemens specifically discloses an image transfer method suitable for the transfer of toner images and having an outer release layer of silicone (column 3, lines 23-28).

A telephone call was made to Mr. Arnold Turk on September 30, 1999 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
